
SUBSTANCE IDENTITY PROFILE: SODIUM ANTIMONATE
(A)(SAA) - April 2017

Data to be reported in sections 1.1 and 1.2 from IUCLID, based on the Guidance for identification and naming of substances under REACH and CLP – Appendix III

(https://echa.europa.eu/documents/10162/13643/substance_id_en.pdf/ee696bad-49f6-4fec-b8b7-2c3706113c7d) and the REACH text Annex VI (<http://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:02006R1907-20161011&from=EN>)

GENERAL INFORMATION

Name **Sodium antimonate (A)/EC 239-444-7/CAS 15432-85-6**

Type of composition **boundary composition of the substance**

State/Form **solid: particulate/powder**

Type of substance **Mono-constituent substance**

Origin **Inorganic**

Highest tonnage band of the Joint Submission **10 - 100**

Type of registration **Full substance**

Compositions covered by the Joint submission:

- **Representative sample**

SIP SAA

International Antimony Association (VZW)

Avenue de Broqueville 12, 1150 Brussels, Belgium/Phone : +32 (02) 762 30 932 / Fax : +32 (2) 762 82 29

A. CONSTITUENTS – REPRESENTATIVE SAMPLE

Reference substance **Sodium antimonate (A)/EC 239-444-7/CAS 15432-85-6**

Typical concentration **> 95 % (w/w)**

Concentration range **> 95 - < 99.9 % (w/w)**

IMPURITIES

Impurity 1: Other impurities for which the individual composition doesn't exceed 0,1% and are not classified and are not relevant for the substance classification

Typical concentration **<= 5 % (w/w)**

Concentration range **>= 0 - <= 5 % (w/w)**
